Skills

Languages & Frameworks:

JavaScript, Python, React.js, Next.js, Tailwind CSS, Express.js, Django

Databases:

PostgreSQL, MySQL, MongoDB

Tools & Technologies:

Git, GitHub, REST APIs, Figma, GIMP

Core Concepts:

MVC Architecture, CRUD Operations, Authentication & Authorization, Form Validation, Session Management, Database Design

Education

Tribhuvan University — Bachelor of Computer Application (BCA)

November 2022 – February 2027

Relevant Coursework: Operating Systems, Database Management Systems (DBMS), Distributed Systems

Experience

Photographer's Journal — Blogging Platform (2025) - Freelance

- Built a photography blog website using React.js.
- Implemented routing, image display components, and user-friendly content layouts.

Projects

Brand — Full-Stack Clothing Store (2025)

- Developed a functional e-commerce platform using React.js, Express.js, and MongoDB.
- Implemented JWT Authentication and CRUD operations for products, orders, and inventory.
- Designed responsive UI and integrated secure API endpoints for data handling.

Multi-Tenant Property Management SaaS (2026)

- Developed a full-stack multi-tenant property management platform using Django REST Framework, Next.js 14, PostgreSQL, and Tailwind CSS.
- Implemented JWT authentication, role-based access control, protected API routing, and secure RESTful services with serializer validation, middleware-based request handling, scalable modular backend architecture and data visualization.
